- Communication and project management tool
- Review and supply comments (if necessary)

Project Planning

Site Map

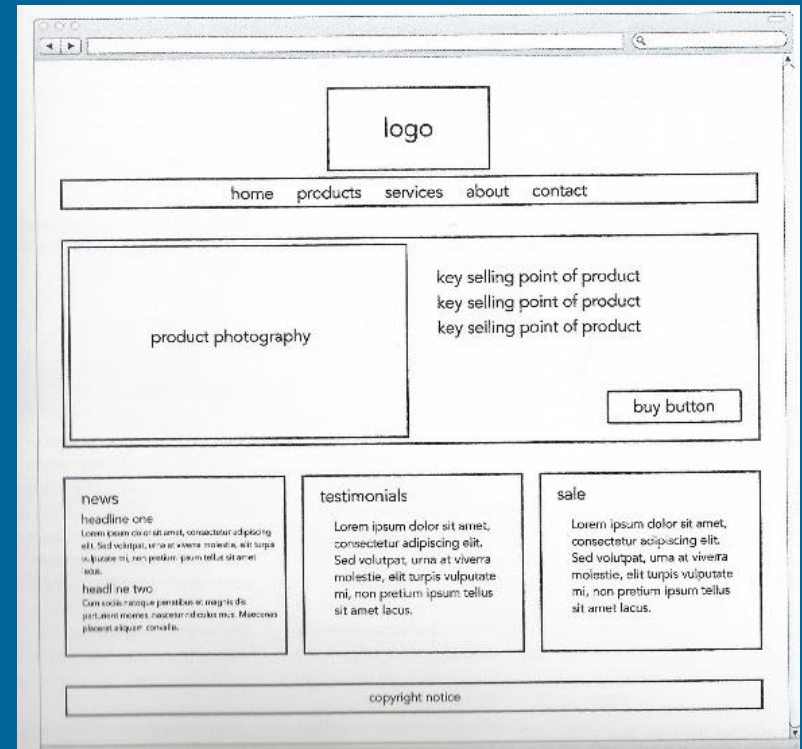

“The aim is to create a diagram of the pages that will be used to structure the site. This is known as a site map and it will show how those pages can be grouped” (Duckett, p. 461)

Project Planning

Wireframe

“A wireframe is a simple sketch of the key information that needs to go on each page of a site. It shows the hierarchy of the information and how much space it might require” (Duckett, p. 463).

PhotoShop

- Introduction
 - PhotoShop is image processing software
 - Use it to manipulate still images and create icons, buttons, backgrounds, etc.
 - Industry standard in digital media for image processing

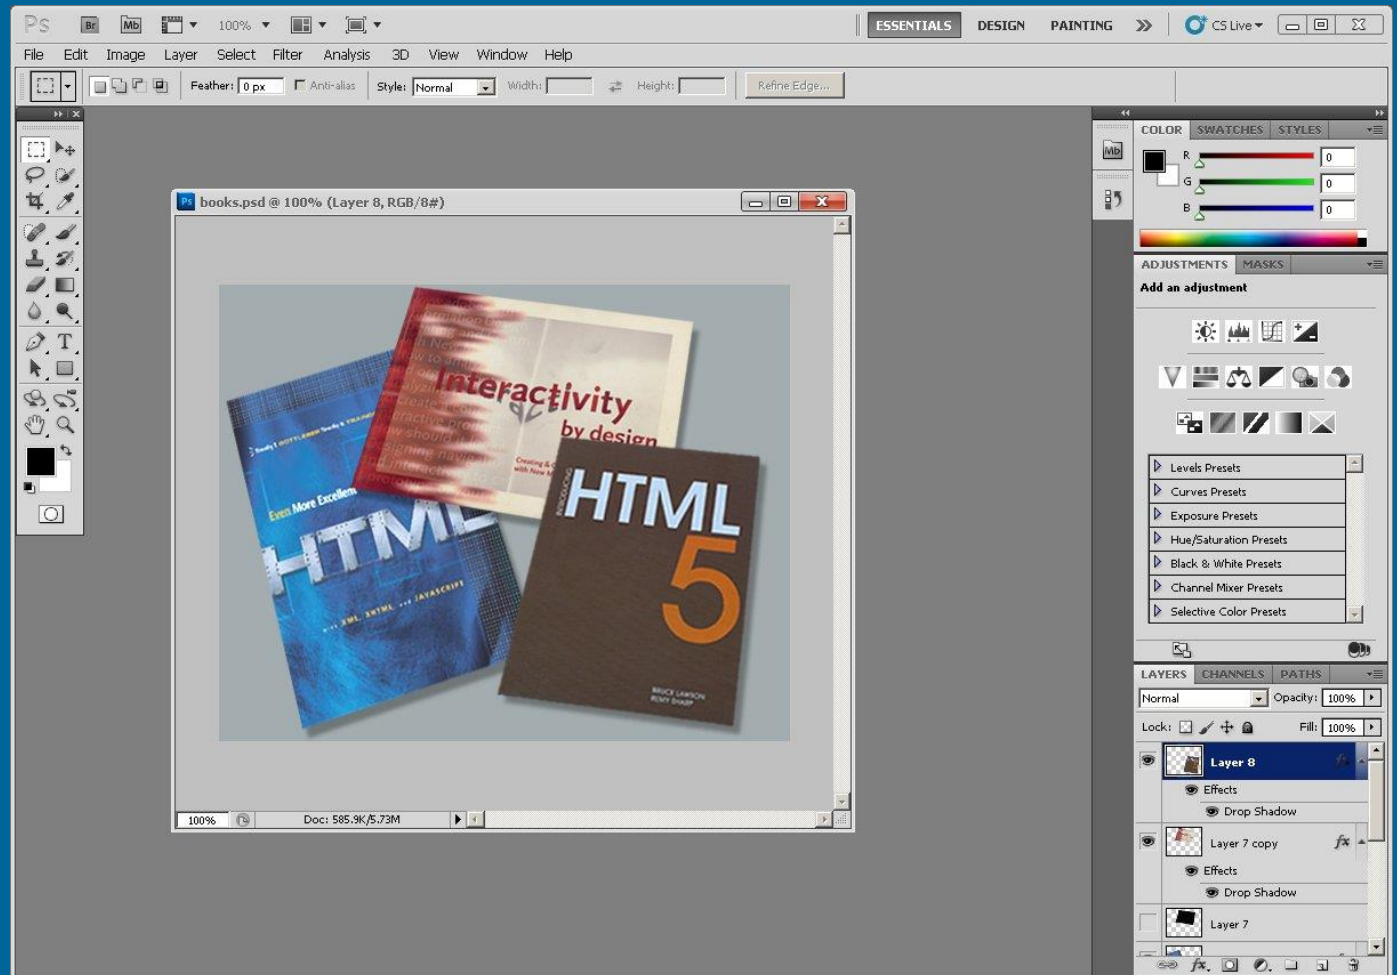

PhotoShop

- Introduction
 - PhotoShop works on the principles of layers
 - A completed PhotoShop image is made up of numerous layers
 - Analogy = collage

Options

Text Tool

Exercise – Add a text layer

Image Processing

- Exercise - Alter an image
 - Change mode
 - Alter image features (brightness, contrast, color, etc.)
 - Change size of image or canvas
 - Use filters to create special effects
 - Add Text

Original

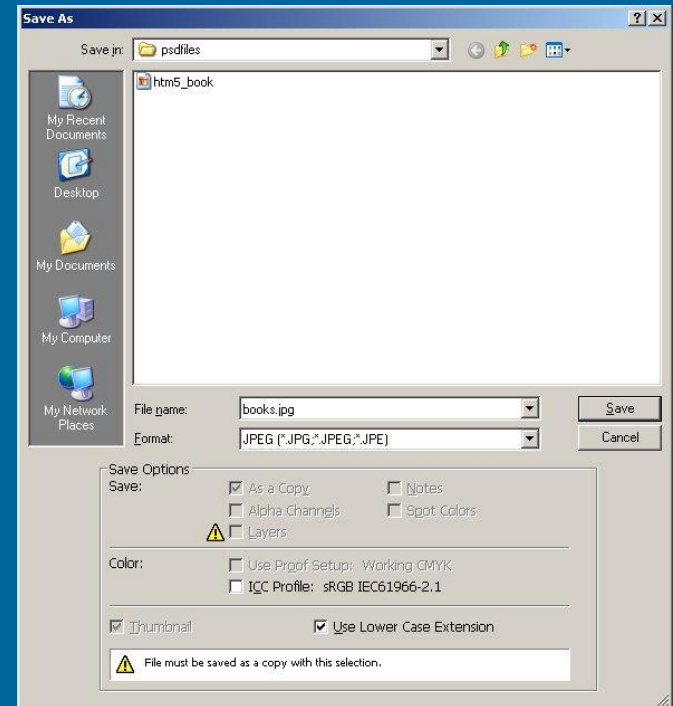

Altered

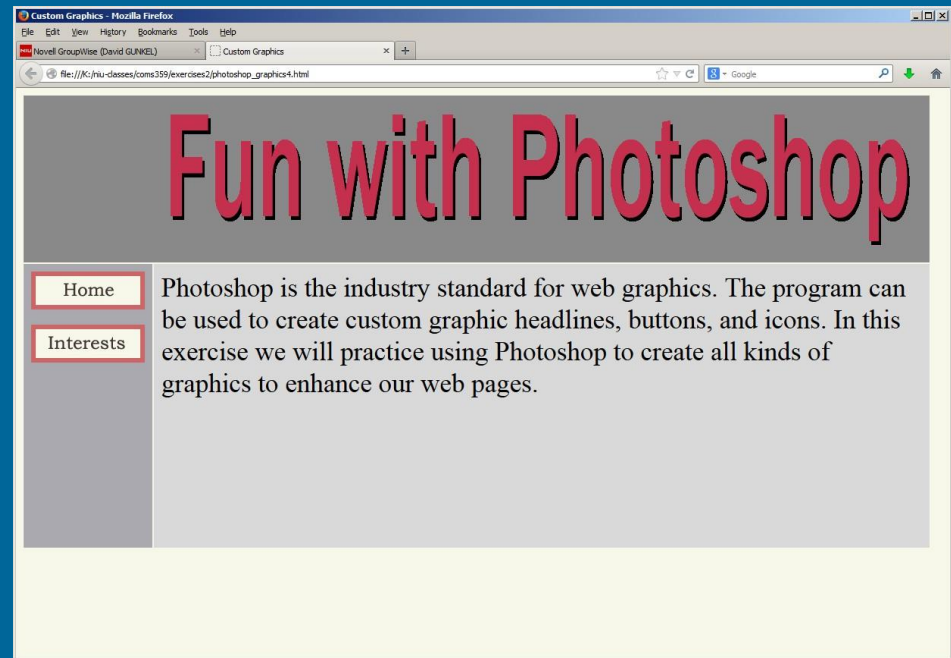

Image Processing

- Saving your new Image
 - “Save As” PSD
 - PhotoShop PSD format
 - Retains layers for future editing
 - “Save As” GIF or JPG
 - Save GIF or JPG for web distribution
 - Does not retain PhotoShop layers

Next Step

- Use PhotoShop for Web Design
 - GIF Headlines
 - JPG Buttons

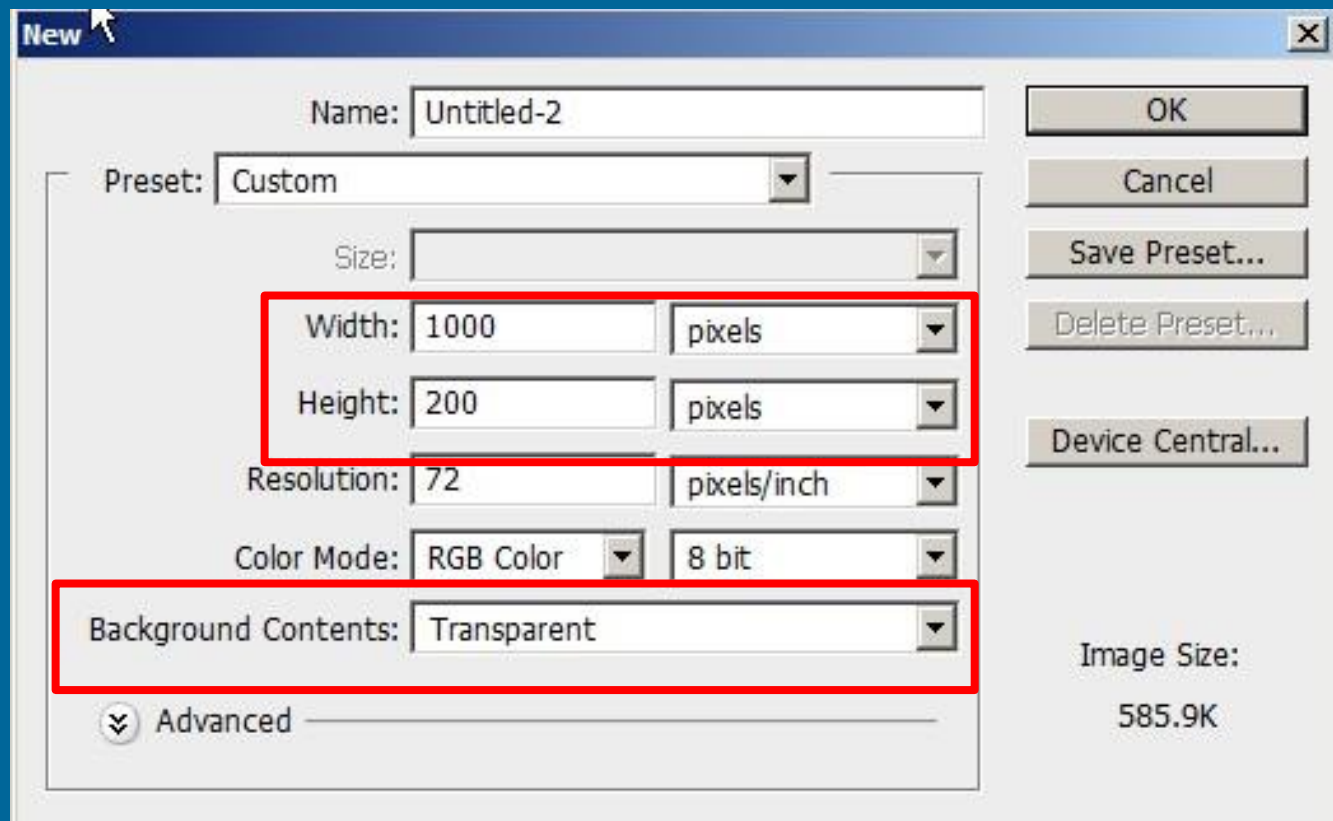

Text Graphics

- Creating text graphics
 - Problem: Text headings in HTML have a limited set of possible appearances (Font, Size, Orientation, etc). Use PhotoShop to create graphical headlines that look better than HTML generated text
 - Procedure: Make graphical headlines in PhotoShop and save them as transparent GIFs for inclusion in web documents

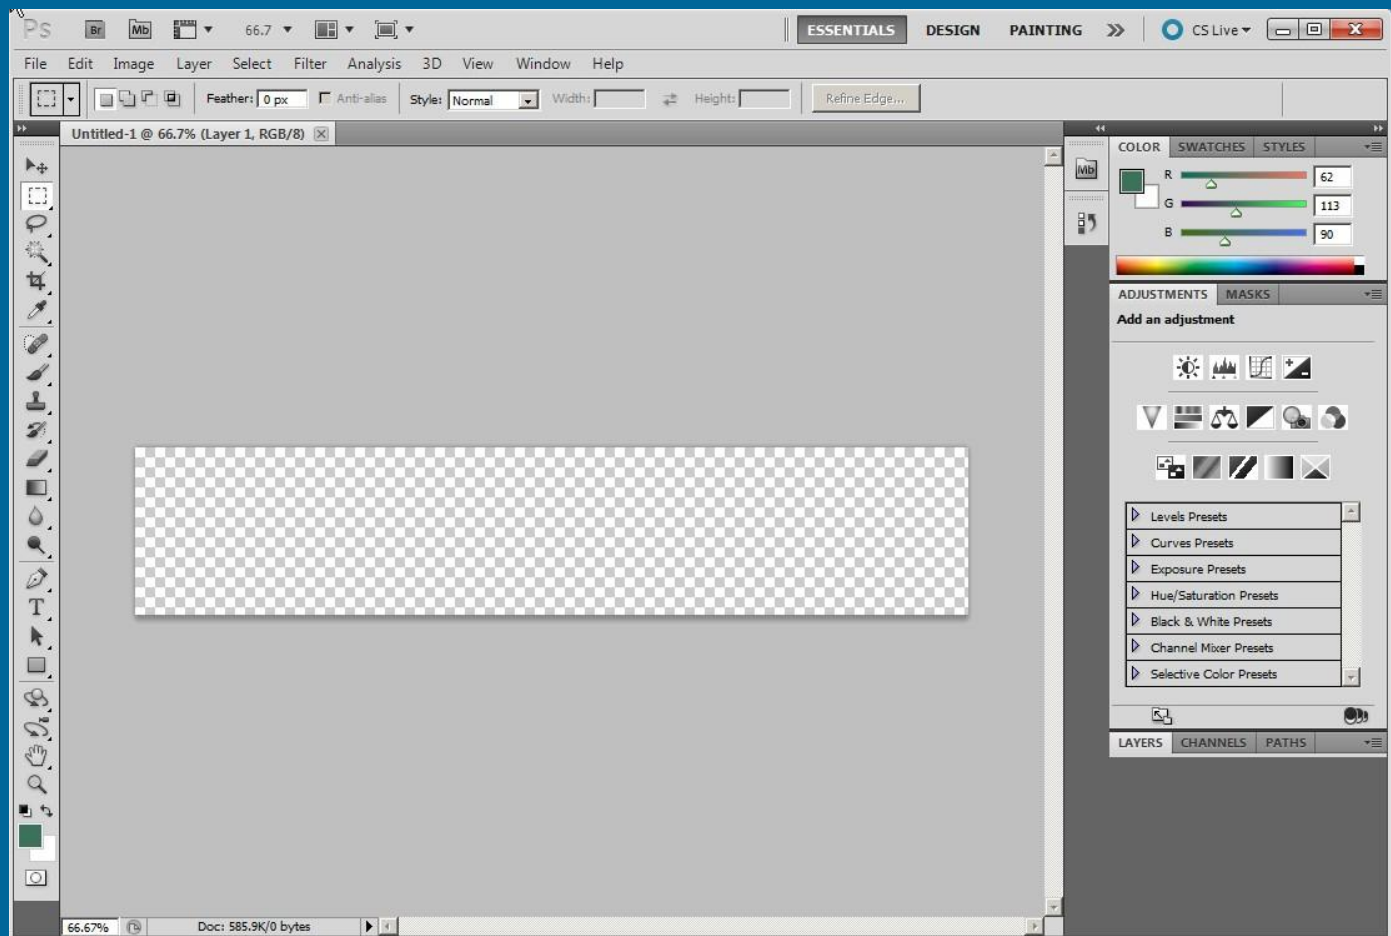

Text Graphics

- Procedure

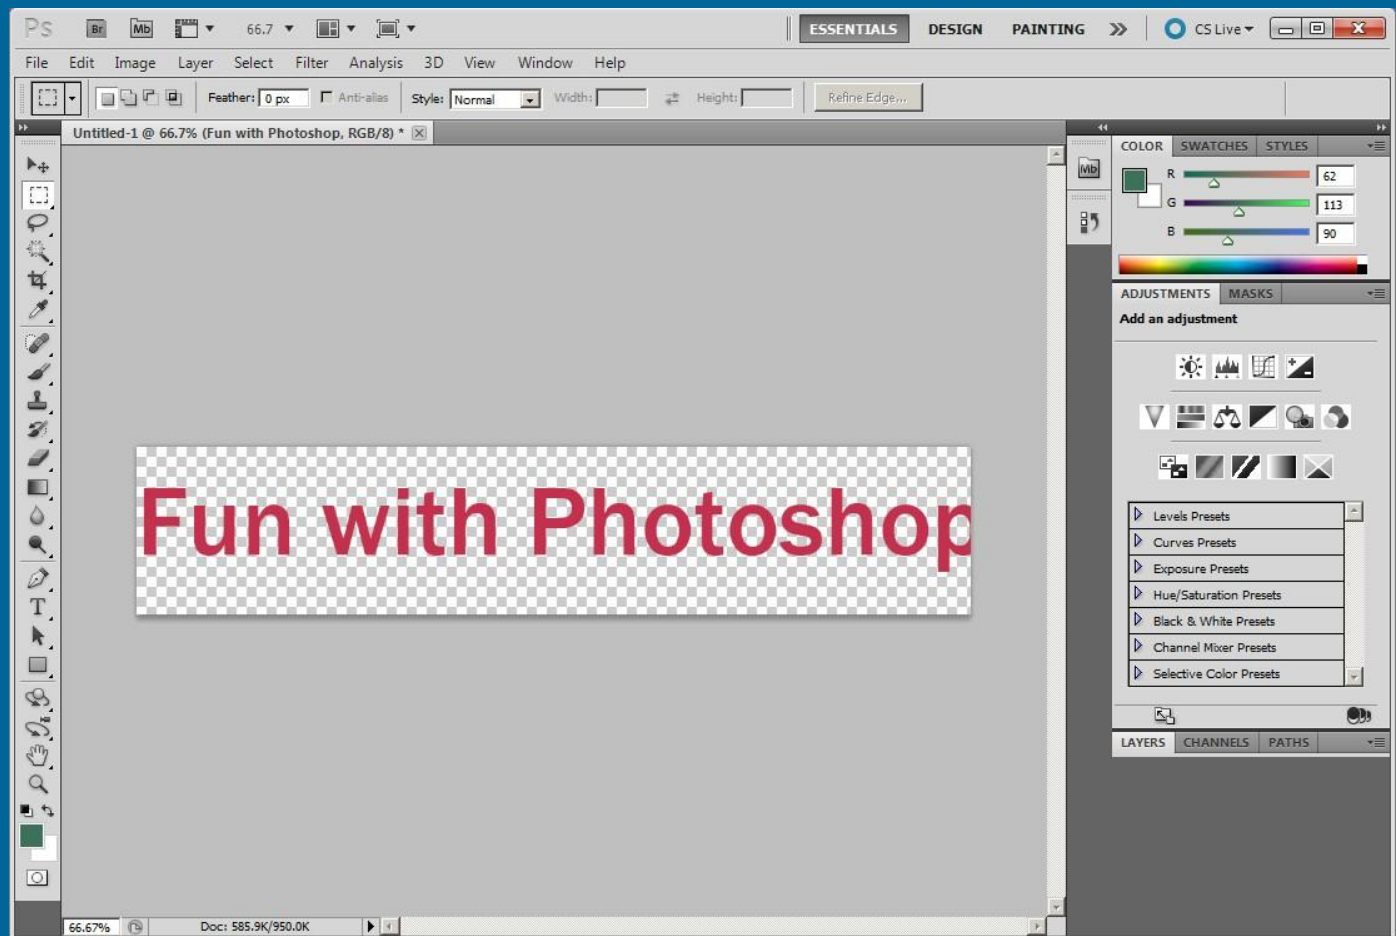

Text Graphics

- Add Text – Use text tool

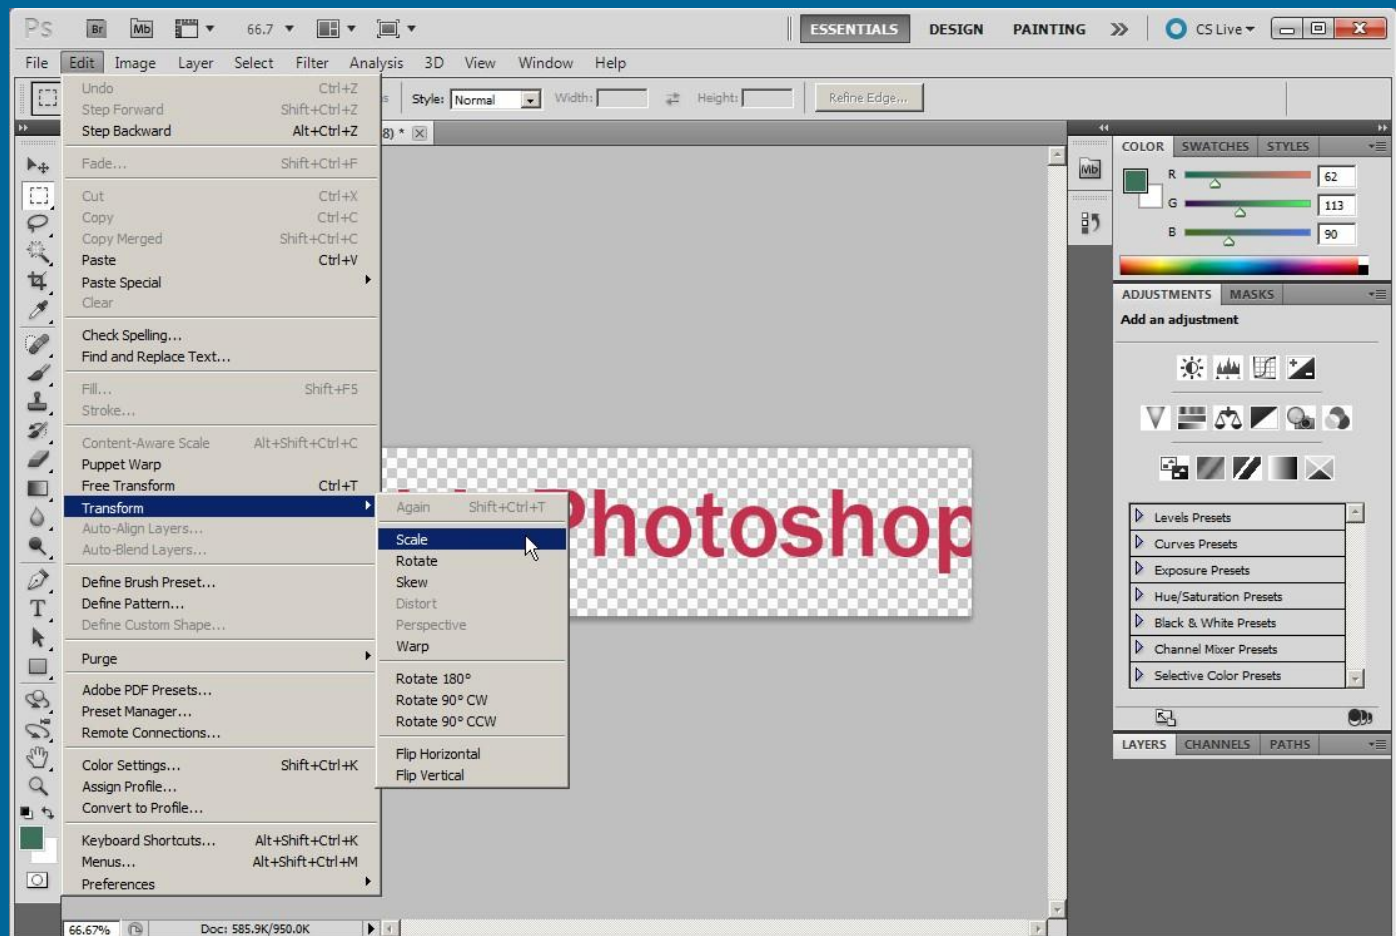

Text Graphics

- Add Text – Use text tool

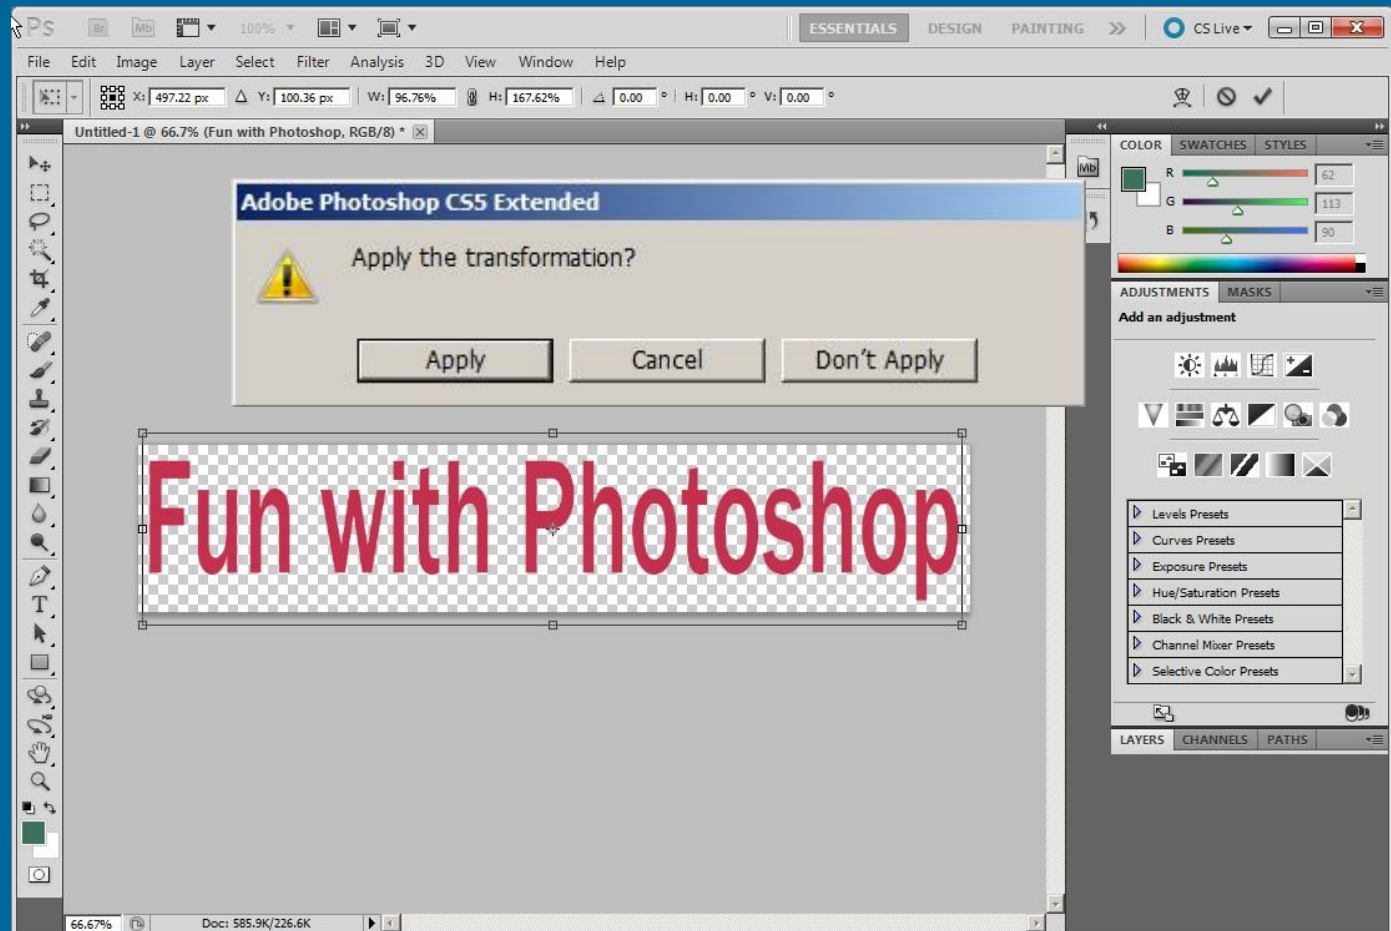

Text Graphics

- Adjust Text – *Edit/Transform/Scale*

Text Graphics

- Adjust Text – *Edit/Transform/Scale*

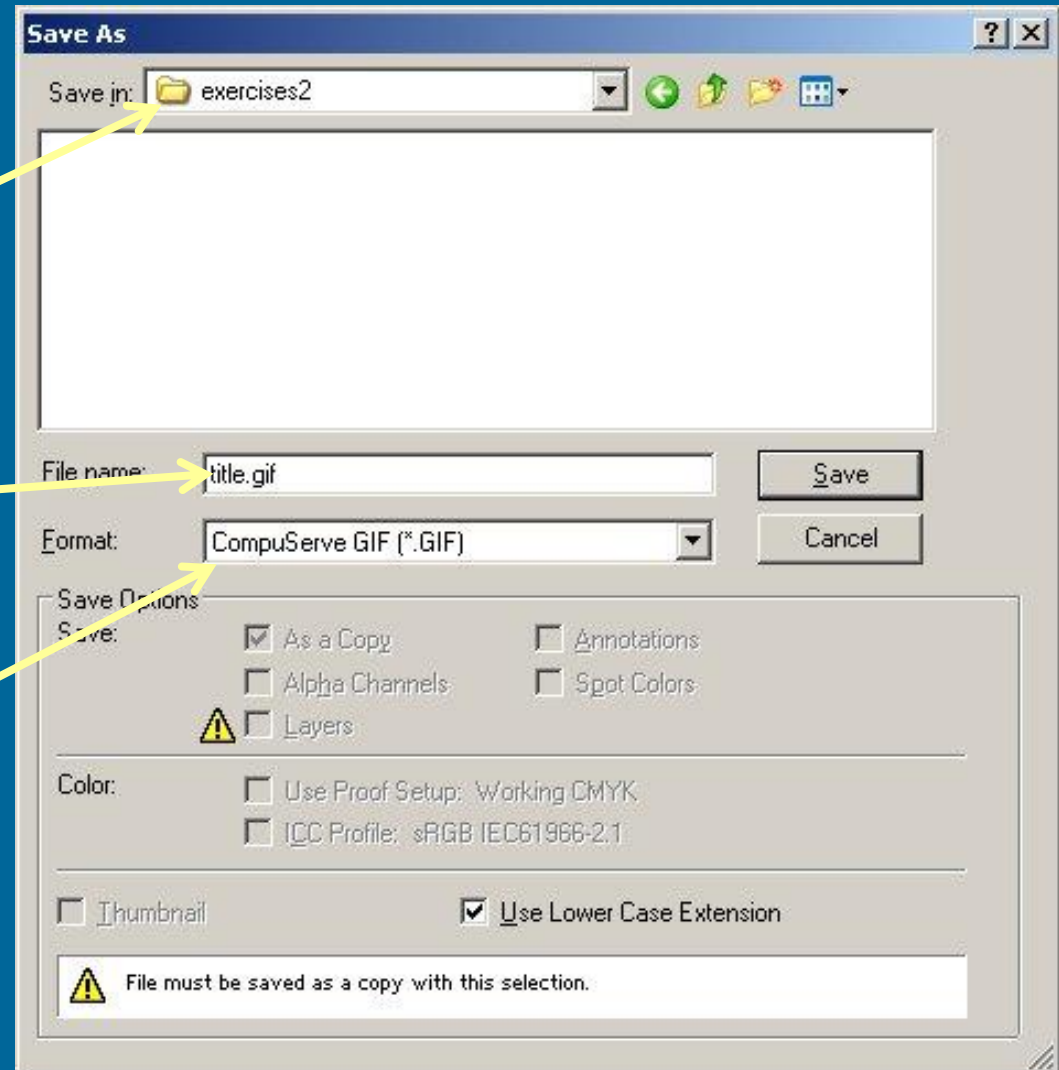

Text Graphics

- Saving
 - “Save As”

Select Destination

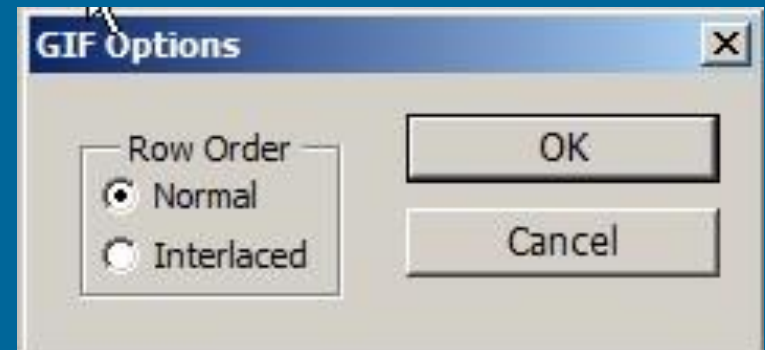

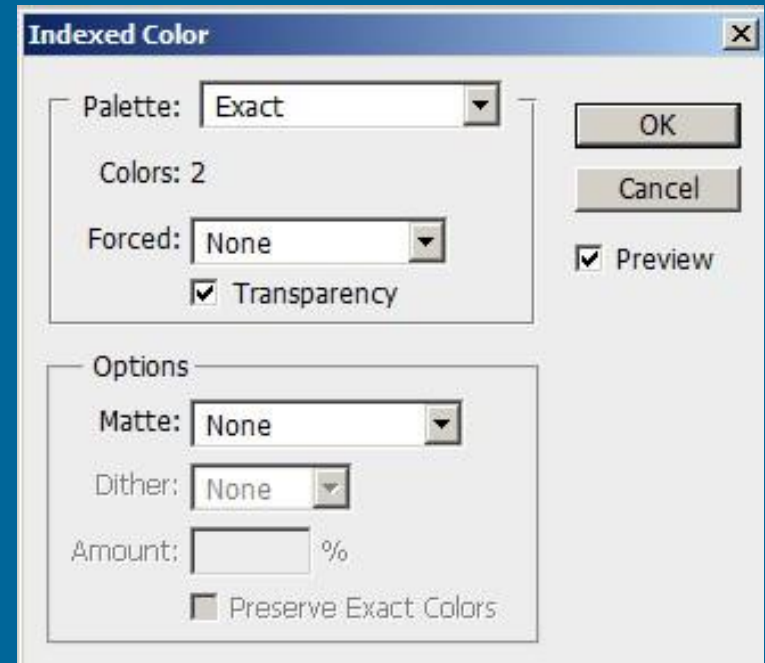

Enter File Name
title.gif

Select Format
CompuServe GIF

Text Graphics

- Indexed Color
 - Pallet = Web
 - Transparency*
- GIF Options
 - Normal*
 - Interlaced

Text Graphics

- Viewing the transparent GIF
 - Create a web page that inserts the GIF file at the top of the page
 - Set a background color for the page
 - Open the document in your browser
 - Notice that the graphic is superimposed over the background color
 - This is the benefit of the transparent GIF - Looks like the image is applied to the background

```

Buttons

- Clickable buttons
- Two tasks
 - Create buttons in PhotoShop
 - Make Buttons active by embedding hypermedia links in the HTML document

Buttons

- File, New
 - Width = 150
 - Height = 50
 - Resolution = 72
 - Mode = RGB
 - Contents = Trans.

50 pixels

150 pixels

Buttons

- Fill the background
 - Select Color
 - Edit - Fill - Foreground

Buttons

- Add boxes for text
 - Layer - New
 - Select Color of overlays
 - Use Marquee Tool to create a small rectangle
- Add text
 - Text Tool
 - Select Font, Size & Color
 - Enter text
 - Position text with Move Tool

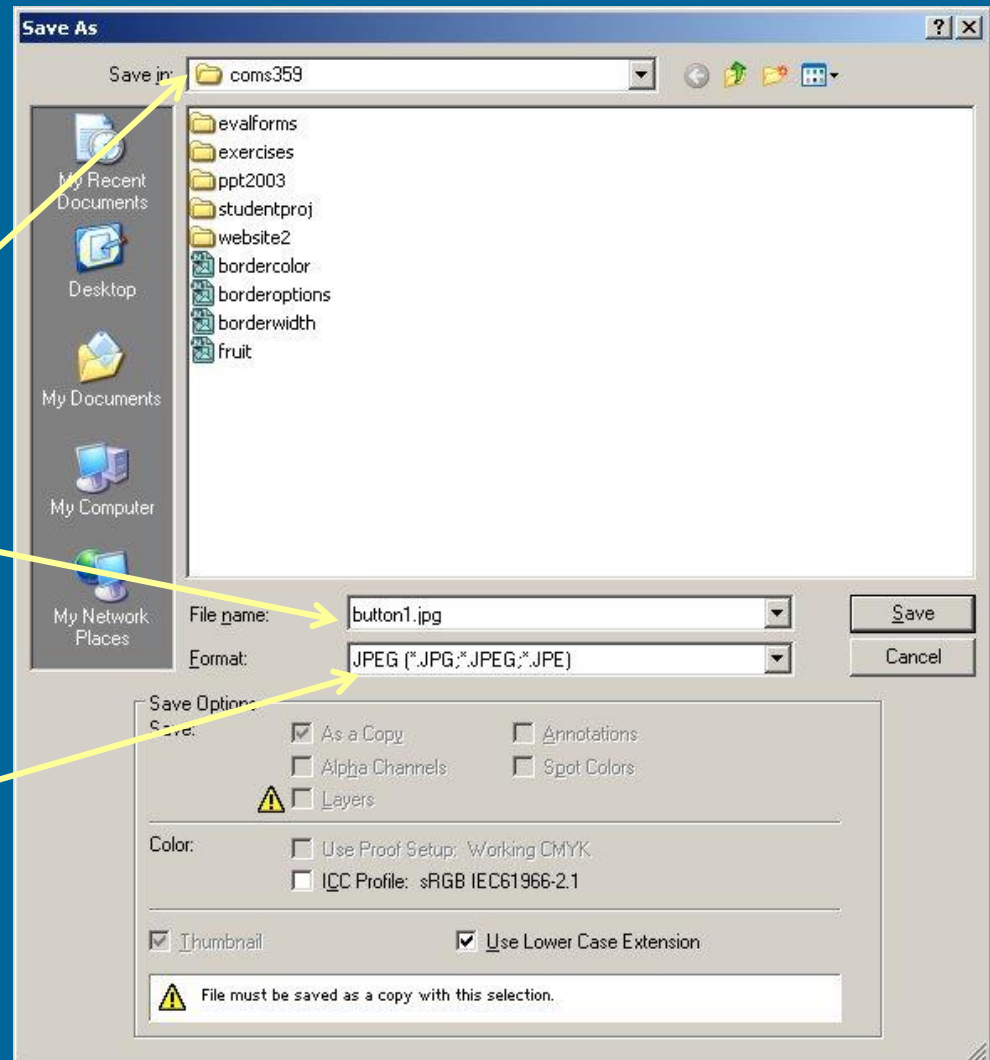

Buttons

- Save As
